Executive Summary

Introduction and Purpose

Texas Health Resources is proud to present its 2025 Community Health Needs Assessment (CHNA). This report outlines the process and methodology used to identify and prioritize significant health needs across the system, in accordance with federal requirements under the Affordable Care Act. The CHNA covers Texas Health's total service area and is divided into the following six geographic regions: Collin, Dallas and Rockwall, Denton, Kaufman, Southern, and Tarrant. The purpose of the CHNA is to offer a deeper understanding of regional health needs to guide Texas Health's planning efforts in support of actionable, community-engaged initiatives. This report highlights the Southern region.

Key Focus Areas for 2025–2028

1. Healthcare Access, Navigation, and Literacy
2. Transportation
3. Connectedness
4. Food Insecurity

Figure 1: Southern Region

Acknowledgments

“We would like to extend our sincere gratitude to the Texas Health team, community members, partner organizations, and the ECG Management Consultants’ team for their dedication and contributions throughout this process.” – Texas Health Resources

The development of Texas Health’s CHNA was a collective effort that included Texas Health employees, community serving organizations, and community members from within areas of focus that gave us input and knowledge of issues and solutions and those who share our commitment to improve health and quality of life.

Texas Health commissioned ECG Management Consultants to support report preparation for its 2025 CHNA. ECG is a leading healthcare focused consulting firm in the country. The following ECG team members were involved in the development of this report: Jennifer Moody, Partner; Niki Petroff, Senior Manager; Richard Beaton, Manager; Ezra Washington Gore, Senior Consultant.

Letter from President,

At Texas Health, we live by **Our Texas Health Promise: Individuals Caring For Individuals, Together**. This means that we are committed to meeting the needs of our ever-growing communities. But we can’t do that alone.

So when we develop a Community Health Needs Assessment (CHNA) every three years, we collect data through key interviews with those who are in the community each day to better understand what the community needs. After all, when we work together, we can make a difference in Mansfield and its surrounding areas.

Through our 2025 CHNA, we identified several key areas that are impacting our communities: food security; connectedness; transportation; and healthcare access, navigation and literacy. We’ll take a closer look at how we’re collaborating within North Texas to address these challenges and focusing on the end goal – a healthier community.

Keeping in mind our Vision — partnering with you for a lifetime of health and well-being — I hope you’ll find the work we do through our CHNA represents exactly that. Together, we can address the social and environmental factors affecting overall health and well-being in North Texas.

Identified Priority Areas

This section outlines the priority areas Texas Health has chosen to focus on from 2025 to 2028.

The integration of primary and secondary data provided a holistic view of community health across the Texas Health service area. While the secondary data revealed measurable disparities in health outcomes and non-medical drivers of health, the primary data offered context and lived experience from residents, community partners, and local leaders. Taken together, these perspectives highlighted not just where gaps exist, but also how they are experienced on the ground. From this synthesis, a set of priority areas emerged that represent the most pressing health and social needs facing the community. Presented alphabetically, these priorities served as the foundation for Texas Health's community health improvement strategies:

Access/navigation, Behavioral health, Chronic disease (e.g., high blood pressure, diabetes), Food insecurity, Health literacy, Housing insecurity, Personal safety, Connectedness, and Transportation.

Better physical and mental health begins with addressing the non-medical drivers that influence health. Recognizing this impact, Texas Health has chosen to improve both physical and mental health by focusing on non-medical drivers of health. This approach supports an overall goal of prevention and management of chronic diseases and mental health conditions while simultaneously addressing the non-medical barriers that hinder individuals from achieving overall health and well-being. Based on extensive community feedback and analysis of data, the following non-medical drivers have been identified as top concerns:

- **Healthcare Access, Navigation, and Literacy:** With an overall goal of improving an individual's ability to navigate and utilize the healthcare system,

healthcare access, navigation, and literacy includes improving access to affordable care, assistance in navigation through the continuum of care and strengthening health knowledge to allow for informed decision-making.

- **Transportation:** Transportation directly affects a person's ability to access healthcare, healthy food, employment, and other non-medical support. Without reliable, affordable, and safe transportation, individuals may face delays in care, increased isolation, and limited opportunities for maintaining overall well-being.
- **Connectedness:** Having a sense of belonging, social support and meaningful relationships within a community is directly linked to better health outcomes. Connectedness includes fostering connections that help build resilient, healthier communities.
- **Food Insecurity:** Food insecurity refers to the lack of consistent access to safe, nutritious, and affordable food. Addressing this issue supports overall well-being by ensuring individuals can obtain healthy foods and gain the knowledge needed to make informed choices about nourishing their bodies.

Healthcare Access, Navigation and Literacy

- Provider availability
- Insurance coverage
- Health education
- Ability to navigate the system

Connectedness

- Community Engagement
- Programs for older adults that experience social isolation
- Childcare

Transportation

- Rideshare partnerships
- Vouchers
- Policy

Food Insecurity

- Nutrition security
- Food partnerships

Introduction

This section introduces Texas Health's Mission, Vision, and Values; facilities included in the assessment; previous CHNA and community highlights; and the overarching 2025 CHNA process.

Texas Health is a faith-based, nonprofit health system that cares for more patients in North Texas than any other provider.

With a service area that consists of **16 counties and more than eight million people**, the system is committed to providing quality, coordinated care through its Texas Health Physicians Group and **29 hospital locations** under the banners of Texas Health Presbyterian, Texas Health Arlington Memorial, and Texas Health Harris Methodist. Texas Health access points and services, ranging from acute care hospitals and trauma centers to outpatient facilities and home health and preventive services, provide the full continuum of care for all stages of life. The system has **more than 4,300 licensed hospital beds, 6,400 physicians** with active staff privileges, and **over 29,000 employees**.

MISSION

To improve the health of the people in the communities we serve.

VISION

To partner with you for a lifetime of health and well-being.

VALUES

- Respect
- Integrity
- Compassion
- Excellence

For more information about Texas Health, call 1-877-THR-WELL or visit www.TexasHealth.org.

Texas Health Service Area and Facilities

Headquartered in Arlington, Texas, the organization serves the fourth-largest metropolitan region in the US: the Dallas–Fort Worth area. The health system includes 20 acute care hospitals, 4 short-stay hospitals, 3 rehabilitation hospitals, 1 long-term care hospital, 1 wellness center, and a network of physician practices. Figure 2 shows the three acute care Texas Health facilities included in the assessment of the Southern region.

Below is a breakdown of the counties included in the Southern region.

- **Southern:** Comanche County, Eastland County, Erath County, Hood County, and Johnson County

The acute care facilities in this region include the following:

- **Texas Health Harris Methodist Hospital Stephenville**
- **Texas Health Harris Methodist Hospital Cleburne**
- **Texas Health Hospital Mansfield**

Figure 2: Map of Texas Health Acute Care Hospitals across the Southern Region

Previous CHNA Insights

Texas Health Resources is committed to improving the health of the people in the communities we serve. Guided by insights from the **2022 Community Health Needs Assessment (CHNA)**, Texas Health has made meaningful strides in improving community health through targeted programs and strategic financial investments.

The following pages highlight the ways in which Texas Health has fulfilled this mission since the last CHNA.

Priority Areas Strategies

In the previous CHNA conducted in 2022, Texas Health identified three priority areas:

This section focuses on the 2023–2025 implementation strategies that addressed these priority areas.

For more information about these programs highlighted below please visit [Texas Health Community Hope](#).

Behavioral Health

GOAL

Improve quality of life through awareness, detection, treatment, and management of behavioral health conditions.

ACTIONS

- Embed resiliency training in schools to improve resiliency skills among youth overcoming adverse childhood experiences.
- Reduce isolation and improve quality of life in adults 50+.

SPOTLIGHTS

- » **THRIVE:** THRIVE (Together Harnessing Resources to give Individuals Voice and Empowerment) is a Texas Health initiative dedicated to supporting the mental and physical well-being of at-risk students and their families.
- » **Reduce Silos:** Reduce SILOS (Social Isolation and Lift Outcomes for Seniors) is a free program for adults age 50+ designed to serve low-income individuals that report feeling lonely or socially isolated.
- » **School Mental Health Executive Learning Communities:** Texas Health and the Meadows Mental Health Policy Institute (the Meadows Institute) developed new School Mental Health Executive Learning Communities (ELCs). These ELCs bring senior school district officials together for monthly training sessions, in-depth discussions, and important collaborations to effectively implement school mental health programming and improve student outcomes, wellbeing and academic achievement.
- » **Mental Health First Aid:** Texas Health offers Mental Health First Aid training, developed by the National Council for Mental Wellbeing, to equip community members and work site partners with essential skills to recognize and respond to mental health challenges.

» Progress Highlights:

5

THRIVE sites
opened between
2023–2025

70%

of 199 patients in
Reduce SILOS reduced
their depression scores

19

School districts
with ELCs

627

Individuals trained in
Mental Health First Aid
(2023–2024)

Chronic Disease

GOAL

Improve quality of life and preventable healthcare utilization through the continued prevention and management of chronic conditions.

ACTIONS

- Increase community-level access points, resources and referral streams to preventive chronic disease management programs and community initiatives.
- Improve health outcomes, readmission rates and cost savings among unhoused individuals.
- Improve access to medical care and services among unhoused individuals through medical respite care.

SPOTLIGHTS

- » **Wellness for Life-Mobile Health:** Mobile Health provides access to quality preventive care services for adults 18 and older across Texas Health's service areas.
- » **Health Education Lifestyle Program (HELP):** HELP delivers diabetes and hypertension management for uninsured populations.
- » **Health to Home (H2H):** Provides medical recuperation services to unhoused individuals.
- » **Community Resource Center (CMRC):** The CMRC located at Texas Health Allen (opened in May of 2025), offers access to condition-specific care, including bloodwork and education, personalized navigation services, and access to nutrition counseling and support groups—all in one location.
- » **Clinic Connect:** In 2016, Texas Health launched Clinic Connect, a streamlined process for receiving and evaluating funding requests from clinics that reach vulnerable populations and serve as outpatient resources for our acute care hospitals.
- » **Health Food Access:** Texas Health supported multiple food access programs including Good For You Healthy Hubs, Culled Produce Recovery, Growing Good Food Grants, Double Up Food Bucks and Fresh Access.
- » **Progress Highlights 2023–2024:**

5,645

Mobile Patients Seen

682

Mobile Health site visits

176

Individuals served in H2H

48

Individuals connected to an appropriate housing solution

Over 1.3M pounds

Food distributed to 273,584 individuals

GOAL

Increase individual awareness of health information and services that are accurate, accessible and actionable; address non-medical drivers of health by partnering with community organizations

ACTIONS

- Increase community-level access points, resources and referral streams to disease management programs and community initiatives
- Convene multiple congregations/faith-based organizations for activities and/or programs that provide resources/services addressing community needs.
- Improve health outcomes and readmission rates among uninsured and underinsured populations
- Coordinate and provide comprehensive care to patients with the complaint of sexual assault.
- Establish plan that increases capacity for the Sexual Assault Nurse Examiner (SANE) program-related outreach and education.

SPOTLIGHTS

- » **Faith Community Nursing:** Faith Community Nursing equips communities of faith to provide care through health-related ministries.
- » **Continuum of Care:** The Continuum of Care Program is designed to assist patients with chronic health conditions who are at high risk for hospital readmission and poor health due to risks associated with non-medical drivers of health.
- » **SANE:** Texas Health's Sexual Assault Nurse Examiner (SANE) program helps victims of sexual assault.
- » **Community/Congregational Health and Hospital Ministry Partners (CHAMPs):** Six times a year, pastoral care teams welcome clergy to CHAMPs meetings, offering resources to help them support hospitalized patients and their families.
- » **School Based Programs:** Programs include School Learning Gardens, Enhancing Childhood Literacy, Wellness Innovation Grants, Recess Refresh, Educator and Student Summits and School Wellness Network.
- » **Progress Highlights 2023–2024:**

Texas Health Community Impact

In 2019, Texas Health Resources launched Texas Health Community Impact to address health needs identified through the CHNA, focusing on residents within designated priority ZIP codes. This collaborative effort brings together organizations across various sectors to tackle the social, physical, and behavioral health challenges facing underserved communities, with the overarching goal of reducing poor health outcomes.

Since its inception, the initiative has awarded **more than \$23 million** to community-based organizations, **including \$10 million in funding** distributed following the release of the 2022 CHNA. Each grant cycle spans two years, with grantees eligible for one renewal. One full cycle (2023–2024) since the 2022 CHNA has been completed, and the current cycle (2025–2026) is underway. Ten grants were awarded during the 2023–2024 cycle, and eighteen grants have been awarded for the 2025–2026 cycle.

Progress Highlights (2022–2024 Grant Cycle):

14,528
North Texans
Served

76,670
Services
Provided

75%
of programs
demonstrated significant
improvements in their
target priority areas

For additional information, including information on funded projects, visit: <https://www.texashealth.org/Community-Health/Community-Impact>

Policy

Texas Health believes that advancing health requires more than clinical care—it demands a strong voice in the public policy arena. Through its **Government Affairs and Advocacy** team, Texas Health actively engages at the local, state, and federal levels to shape policies that strengthen healthcare delivery and improve community well-being.

In 2024, this program focused on:

Advocating for legislation that expands access to care, supports behavioral health infrastructure, and addresses non-medical drivers of health

Educating the public and stakeholders through voter education initiatives and community engagement

Building strategic partnerships with organizations like the American Hospital Association, Texas Hospital Association, and Dallas-Fort Worth Hospital Council to amplify impact

Promoting civic engagement and responsible corporate citizenship through employee volunteerism and charitable giving

Additional Analysis

In addition to the priority areas listed above, the 2022 CHNA specifically highlighted additional gaps for **transportation**, **substance abuse** and **childcare**. These gaps were analyzed further for strategy development. To enhance previous work in food access, an additional study was completed to identify multi-level barriers and solutions to **nutrition security** from the perspectives of community residents, food system workers, and policymakers in a three-county area.

Transportation

Expanding access to flexible, on-demand transportation services—such as door-to-door options—and offering programs conveniently located within residential communities could help reduce transportation barriers.

Substance Abuse

Between 2019 and 2022, the rate of drug poisoning deaths increased in Texas from 9.5 to 16.1 (per 100,000 population). In 2022, Dallas County and Parker County had the highest drug poisoning death rates in the North Texas area with Dallas County at 18.5 and Parker County at 18.6 (per 100,000 population). Review of data shows that substance abuse involving fentanyl and methamphetamine are a growing and persistent problem in North Texas. A geographical analysis showed a higher priority for community programs throughout Dallas County and Tarrant County as well as more targeted areas surrounding Weatherford and Springtown.

Childcare

In Texas, 48% of individuals live in a childcare desert—areas with limited access to licensed childcare providers. Nine priority zip codes were identified as daycare deserts: **75180, 75220, 75057, 76431, 76031, 75161, 75106, 76115, 76164**.

Nutrition Security

Qualitative research was conducted among policymakers, food system workers (FSW), and community members around nutrition security. These three groups undoubtedly agreed that food programs were a key to increasing nutrition security, from increasing awareness of current programs, to increasing the availability, hours, and locations of food programs.

2025 CHNA Process

Building on the insights from the previous CHNA, Texas Health approached the 2025 assessment with a structured, data-informed methodology, shown in figure 3. First, Texas Health assessed the priority ZIP codes from the previous CHNA and curated a new targeted list accounting for any shifts in the patient population and internal non-medical drivers of health screening data. Once the targeted communities were identified, Texas Health engaged nearly 650 stakeholders—including community leaders, residents, and partner organizations—through interviews, focus groups, and a distributed survey to ensure the assessment reflected a wide range of perspectives. Then, a comprehensive secondary data analysis was conducted across the full-service area, focusing on a range of non-medical and medical drivers of health. The qualitative input, referred to as primary data, was synthesized alongside secondary data to identify the most pressing health needs. These insights will guide Texas Health’s strategic priorities from 2025 to 2028.

Figure 3: 2025 Texas Health CHNA Process

Prioritization Process

This section outlines Texas Health's methodology for identifying priority ZIP codes for the 2025 CHNA and provides a brief overview of key characteristics within those communities.

Overview

Before conducting the primary and secondary analyses for the 2025 CHNA, Texas Health reassessed its priority ZIP codes to ensure alignment with current community needs detailed in Appendix D. This evaluation focused on areas with a high proportion of Texas Health patients as well as those showing greater need based on internal social risk screening data. Figure 4 displays the location of these prioritized ZIP codes in the Southern region. While these areas will help inform targeted CHNA strategies, Texas Health remains committed to serving the needs of all individuals across the Southern region. It is important to note that while the urban, or more densely populated counties, reflect more prioritized ZIP codes per region, the ZIP codes in the more rural counties cover more geographic territory.

Figure 4: Priority ZIP Codes in Southern Region

Region	Number of Priority ZIP Codes
Southern	7

Priority ZIP Codes

The total population for the priority ZIP codes in the Southern region in 2025 is 126,518, with a significant 7% projected growth rate by 2030.

Table 1 shows the 2025 population and projected five-year growth of the priority ZIP codes. More detailed ZIP code characteristics are provided in the appendix.

Region	Priority ZIP Code	City	2025 Population	Five-Year Growth Rate
Southern	76009	Alvarado	26,588	11%
	76031	Cleburne	19,473	9%
	76033	Cleburne	31,350	9%
	76059	Keene	5,414	9%
	76093	Rio Vista	2,886	13%
	76401	Stephenville	32,016	2%
	76446	Dublin	8,791	3%

Table 1: Priority ZIP Codes Population

Demographics

This section provides an overview of the demographic composition within Texas Health's service area. Key indicators evaluated include population and age distribution, language spoken at home, and race and ethnicity.

Population and Age Distribution¹

With a total population of 362,072, the Southern region has a higher proportion of children under the age of 18 (23%) and a greater proportion of adults aged 65 and older (18%) compared to national benchmarks (22% and 17%, respectively). Population growth is robust, with a projected five-year growth rate of 9%. Figure 5 shows the distribution of age in the Southern region. More detailed population and age characteristics by ZIP code are provided in the appendix.

Figure 5: Age Distribution in the Southern Region by County

¹ Claritas (2025).

Language²

English proficiency in the Southern region is 94%, which is above the national average (92%) and Texas average (87%). Spanish is the next most common language spoken, with 14% of residents speaking Spanish at home. Comanche and Johnson County have the greatest concentration of Spanish speaking residents. Figure 6 shows the distribution of languages spoken at home and English proficiency in the region. More detailed language characteristics by ZIP code can be found in the appendix.

Figure 6: Language Spoken at Home and English Proficiency by County

² American Community Survey (2019–2023).

Race and Ethnicity³

The majority of the population in the Southern region is White (78%), which is well above the national average (63%) and the state average of 54%. Residents that are two or more races represent 12% of the population. Black/African American residents are the third-largest racial group (3%) in the Southern region. Additionally, Hispanic residents make up 23% of the service area population, which is above the national average (19%) and Texas average (40%), with the highest concentration in Johnson and Commanche County. The Southern region reflects less racial and ethnic diversity than the broader service area. Figure 7 shows the race and ethnicity distribution by county in the region. More detailed race and ethnicity characteristics by ZIP code can be found in the appendix.

Figure 7: Race and Ethnicity Distribution by County

³ American Community Survey (2019-2023)

Methodology

This section outlines the methodology used to evaluate the service area, including a detailed description of the primary and secondary data sources that informed the assessment.

Data Triangulation

Data triangulation is a method used in research and evaluation to enhance the credibility, validity, and richness of findings by combining data from multiple sources.

For the 2025 CHNA process, there were two main sources of data.

- Primary Data: Key informant interviews, the community organization survey, and focus groups
- Secondary Data: Healthy Communities Index (HCI), Texas Health Non-medical Drivers of Health Screening data, and other public national and state datasets

The diagram below demonstrates how key themes were developed, illustrating the intersectionality of these two sources.

Primary Data: Key Informant Interviews, the Community Organization Survey, and Focus Groups

Key Informant Interviews

ECG and Texas Health interviewed 39 key informants (i.e., Texas Health hospital representatives) across the six regions. Interview questions focused on community needs, trends that have emerged since the last CHNA, and the extent to which Texas Health is known to community partners.

Focus Groups

A total of 216 individuals participated in 24 focus groups (8 organizational and 16 community based) conducted by ECG and Texas Health across the six regions. Each focus group addressed community health needs, recent health trends, and Texas Health's visibility to community partners.

Community Organization Survey

A community organization survey sent to organizations within the six regions yielded 379 responses representing 312 unique organizations. Questions in the survey covered Texas Health's community contributions, unmet community needs, and potential shifts in priorities since the last CHNA.

Secondary Data: HCI, Texas Health Risk Screening Data, and Other Public National and State Datasets

Healthy Communities Index (HCI)

While primary data provides critical insight into community perspectives and lived experiences, quantitative data helps illustrate the broader, structural conditions impacting health across the service area. To support this, Texas Health utilized ECG’s comprehensive HCI to identify and compare key barriers to health across the six regions. The HCI integrates publicly available data from the *American Community Survey (2019–2023)* and CDC PLACES (2024 ZCTA release) to evaluate social and structural factors that influence health. Grounded by the US Department of Health and Human Services’ Healthy People 2030 plan and informed by current literature, the tool organizes metrics into 13 core domains that represent non-medical and medical drivers of health. To quantify these barriers, each ZIP code receives a standardized domain score using z-score methodology that measures its relative standing compared to national averages. Each ZIP code is then placed into one of five tiers across each domain, which reflect national percentile-based ranking, as follows:

Tier	Description	National Percentile Range
5	Highest barriers (most at risk)	80th to 100th
4	High barriers	60th to 79th
3	Moderate barriers	40th to 59th
2	Low barriers	20th to 39th
1	Lowest barriers (most advantaged)	0 to 19th

This five-tiered system supports clear and consistent prioritization. ZIP codes in higher tiers often face greater social and structural challenges, correlating with lower self-rated health and shorter life expectancy. The HCI provides a robust foundation for identifying underserved areas, supplementing stakeholder insights from the primary data collection.

Domains Included in the HCI

The 13 domains assessed through the HCI represent a comprehensive view of health-related conditions and access.

These include insurance access and preventive care access, which reflect the ability to afford and receive timely medical services; educational attainment and income, which shape economic stability and health literacy; and employment, which provides not only income but often health benefits. Housing stability and food security are key determinants of chronic disease management and stress, while transportation access influences a person’s ability to reach care, employment, and essential resources. Technology access is increasingly critical for telehealth and health information access, and social connections play an important role in mitigating isolation and promoting mental well-being. The index also accounts for the prevalence of chronic diseases, such as diabetes and hypertension; the existence of behavioral health conditions, including mental illness and substance use disorders; and the presence of physical, mental, or cognitive disabilities that may limit a person’s ability to achieve optimal health. Figure 8 highlights the 13 domains included in the assessment.

Figure 8: HCI Core Health Domains

Other Public National and State Datasets

In addition to the data in the HCI, other data from national and state sources at the county level were considered for more evidence. Some of these include aggregated sources from County Health Rankings & Roadmaps and individual government sources such as the US Environmental Protection Agency.

Texas Health Non-medical Drivers of Health Screening Data

As of Jan. 1, 2024, the Centers for Medicare & Medicaid Services now requires hospitals participating in the Hospital Inpatient Quality Reporting Program, such as Texas Health, to screen all adult inpatients (aged 18 and older) for the following five key non-medical drivers of health:

- Food Insecurity: Identifies whether patients have experienced worry about their ability to or the actual inability to afford enough food in the past 12 months
- Housing Instability and Quality: Assesses whether patients have a stable living situation and whether their housing environment poses health or safety risks
- Transportation Access: Screens for the lack of reliable transportation that may interfere with medical care, work, or daily activities
- Utility Needs: Determines whether utility services (electricity, gas, water) have been shut off or threatened to be shut off
- Personal Safety: Evaluates whether patients have experienced physical harm, threats, or emotional abuse from others, including family or friends

Limitations

ECG and Texas Health acknowledge that both primary and secondary data sources have inherent limitations. While these limitations do not invalidate the data, they underscore the importance of interpreting findings within the appropriate context, recognizing that no data collection effort is without imperfections

Primary Data Limitations

Community Organization Survey: Survey contains limited geographic coverage due to the availability of participating organizations within the service area.

Key Informant Interviews and Focus Groups: Personal or group bias, limited geographic coverage (due to the inability to represent every area of the service region), and small sample sizes may limit the extent to which findings reflect the full range of community perspectives.

Secondary Data Limitations

HCI: The use of public data often presents a reporting lag of two to three years.

Texas Health Non-medical Drivers of Health Risk Assessment: This assessment only includes data from Texas Health patients.

County-Level Sources: These do not account for ZIP code–level variation, and the use of public data often presents a reporting lag of two to three years.

Secondary Data: 13 Health Domains

This section provides a narrative overview of the 13 health domains included in the HCI, supplemented by county-level data and internal Texas Health sources to offer additional context and insight.

Each health domain in the HCI was analyzed across the Southern region. Table 2 presents the average barrier level for each domain within each county in the Southern region, calculated as the population-adjusted, weighted average of health domain scores for all ZIP codes in that county.

Barrier levels are categorized as follows:

- Tier 5: The domain reflects severe barriers that significantly threaten community health and well-being.
- Tier 4: The domain presents notable challenges that may contribute to poor health outcomes if unaddressed.
- Tier 3: The domain includes some barriers that could affect access, outcomes, or quality of life.
- Tier 2: The domain shows generally supportive conditions, with only minor concerns present.
- Tier 1: The domain reflects strong, supportive conditions that promote optimal health and stability.

Additionally, it is important to note that (1) barriers vary within each county and (2) ZIP code–level differences may be masked by county averages. More granular analyses at the ZIP code level are provided in the appendix.

County	Insurance Access	Preventive Care Access	Educational Attainment	Income	Employment	Housing Stability	Food Security	Transportation	Technology Access	Connectedness	Chronic Disease	Disability	Behavioral Health
Comanche	●	●	●	●	●	●	●	●	●	●	●	●	●
Eastland	●	●	●	●	●	●	●	●	●	●	●	●	●
Erath	●	●	●	●	●	●	●	●	●	●	●	●	●
Hood	●	●	●	●	●	●	●	●	●	●	●	●	●
Johnson	●	●	●	●	●	●	●	●	●	●	●	●	●

Table 2: 13 Health Domain Barriers by County

Table 2 highlights significant differences between Comanche, Eastland, Erath, Hood, and Johnson County across the 13 measured domains. Notable disparities are seen in income, technology access, and disabilities. These findings illustrate how, even within the same broader region, sub–service areas can experience vastly different non-medical drivers of health. The following pages provide a detailed breakdown of each domain within the Southern region and identify specific ZIP codes where residents face greater barriers to health.

Insurance Access

Lack of insurance can lead to delayed care or make healthcare services financially inaccessible.⁴ Figure 9 shows the level of barrier by ZIP code in the Southern region for the insurance access domain. This domain considers one measure: the rate of insured adults aged 18 to 64. This is a particularly important population, as adults aged 18 to 64 make up the largest age group in the service area.

Figure 9: Insurance Access Barriers

Figure 10 shows that all five counties fall below the national benchmark for insured adults aged 18 to 64, highlighting a significant barrier to insurance access. Although all five counties surpass the Texas state

average, the data highlights the ongoing need for expanded healthcare coverage and access, as Texas continues to lag behind national levels. In the Southern region, Comanche County exhibits the highest barriers. County-level data⁵ further reinforces this challenge: both counties in the service area exceed the national average for uninsured children (5%), with the highest rate in Erath County at 13%. These patterns highlight persistent gaps in insurance coverage across both adult and pediatric populations.

Figure 10: Insured Rate by County Among Adults Aged 18–64 (CDC PLACES [2024]). Higher insurance rates typically lead to more favorable health outcomes.

⁴ KFF (2023).

⁵ County Health Rankings & Roadmaps (2025).

Preventive Care Access

Research shows that limited access and low participation in preventive services—such as cancer screenings, routine primary care, and medication adherence for chronic conditions—are associated with significantly poorer health outcomes.⁶ Figure 11 shows the level of barrier by ZIP code in the Southern region for the preventive care access domain. Five measures are considered in this domain: blood pressure medication access, mammography screening rate among adults aged 50 to 74, colon screening rate among adults aged 45 to 75, annual dentist visit among adults, and annual visit to the doctor for routine checkup among adults. Together, these measures serve as a proxy for the ease of accessing screenings, primary care, and essential medications.

Figure 11: Preventive Care Access Barriers

⁶ US Department of Health and Human Services, Healthy People 2030: Preventive Care.

Figure 12 shows all five counties (except Hood County) are at or below the national average for annual primary care visits and colon screenings among adults aged 45 to 75, reflecting a significant barrier of access to preventive care in the service area. Erath County has the greatest barriers in the region. Additionally, county-level data revealed that all five counties in the service area have an insufficient supply of primary care providers, mental health providers, and dentists, with provider-to-population ratios worse than the national average,⁷ further hindering access to preventive care.

Figure 12: Preventive Care Access Measures by County (CDC PLACES [2024]). Higher primary care visits and colonoscopies typically lead to more favorable health outcomes.

⁷ County Health Rankings & Roadmaps (2025).

Educational Attainment

Research shows that educational attainment is correlated with health literacy, which affects chronic disease management and healthcare navigation.⁸ Figure 13 shows the level of barrier by ZIP code in the Southern region for the educational attainment domain. Two measures are considered in this domain: adults over 25 years of age with at least a high school diploma and adults over 25 years of age with at least a bachelor's degree. These metrics are a proxy for health literacy.

Figure 13: Educational Attainment Barriers

Figure 14 shows four of five counties in the region (except Hood County) are below the national average for adults aged 25 and older with at least

a high school diploma or bachelor's degree, potentially reflecting a significant barrier of health literacy in the Southern Region. However, figure 13 shows central Johnson County and southwest Erath County is more vulnerable than the rest of the Southern region.

Figure 14: Educational Attainment Measures by County (American Community Survey [2019–2023]). Higher rates of adults with at least a high school diploma typically lead to more favorable health outcomes.

⁸ National Assessment of Adult Literacy and the Agency for Healthcare Research and Quality.

Income

Income is a significant predictor in one's ability to afford out-of-pocket medical costs.⁹ Figure 15 shows the level of barrier by ZIP code in the Southern region for the income domain. This domain considers one measure: median household income.

Figure 15: Income Barriers

Figure 16 shows four of five counties in the region (except Hood County) is below the state and national benchmarks for median household income, potentially reflecting income barriers in Southern region.

However, figure 15 shows the greatest barriers are concentrated in central Johnson, Comanche, Erath, and Eastland County.

Figure 16: Median Household Income by County (American Community Survey [2019–2023]). Higher income typically leads to more favorable health outcomes.

⁹ KFF, “Key Facts About the Uninsured Population” (2023).

Employment

Employment is a significant predictor in one's ability to access commercial health insurance, as most health insurance in the US is employer-sponsored insurance (ESI).¹⁰ Figure 17 shows the level of barrier by ZIP code in the Southern Region for the employment domain. One measure is considered in this domain: the civilian unemployment rate.

Figure 17: Employment Barriers

Figure 18 shows that Erath, Hood, and Comanche County has a slightly higher unemployment rate than the national and state benchmarks. It is also important to note that in Texas, 94.9% of large firms (i.e., 50 or more employees) offer ESI, while 28.7% of small employers offer ESI.¹⁰

Figure 18: Civilian Unemployment Rate by County (American Community Survey [2019-2023]). Higher unemployment typically leads to less favorable health outcomes.

¹⁰ KFF, Employer Health Benefits Survey (2023).

Housing Stability

Housing instability can lead to exposure to toxins, reduced ability to manage chronic disease and other illnesses, and stress.¹¹ Figure 19 shows the level of barrier by ZIP code in the Southern region for the housing stability domain. Three measures are considered in this domain: housing insecurity among adults in the last 12 months, threat of utilities shutting off among adults in the last 12 months, and percentage of households with a housing burden (i.e., spending more than 30% of income on housing). These metrics all describe the housing stability of a service area.

Figure 19: Housing Stability Barriers

Figure 20 shows four of five counties in the region (except Hood County) are above the national benchmark for housing insecurity and threat of utilities shutting off, potentially reflecting a significant barrier of housing stability in the Southern region. However, figure 19 shows central Johnson and Erath County have the greatest barriers. While Hood County as a whole falls below the national benchmark, southwest Hood County may still experience localized challenges related to housing stability.

Figure 20: Housing Stability Measures by County (CDC PLACES [2024]). Higher housing insecurity and threat of utilities shutting off typically lead to less favorable health outcomes.

¹¹ US Department of Health and Human Services, Healthy People 2030.

Food Security

Food security is essential for managing chronic disease and illnesses.¹² Figure 21 shows the level of barrier by ZIP code in the Southern region for the food security domain. Two measures are considered in this domain: food insecurity among adults in the last 12 months and receiving food stamps among adults in the last 12 months. The food insecurity metric describes the lack of consistent access to enough food for every person in a household to live an active, healthy life. The metric for receiving food stamps is an additional indicator to understand who needs and utilizes food assistance in the service area.

Figure 21. Food Security Barriers

Figure 22 shows all five counties (except Hood County) are above the national benchmark for food insecurity and adults receiving food stamps. Although Hood County is below the national benchmark, figure 21 shows that southwestern Hood County may face food security barriers.

Figure 22: Food Security Measures by County (CDC PLACES [2024]). Higher food insecurity typically leads to less favorable health outcomes.

¹² Gregory and Coleman-Jensen, USDA Economic Research Service (2017; updated 2022).

Transportation

Reliable transportation is essential for accessing care, particularly in a service area where patients often need to travel to receive services. Transportation includes public transit, personal vehicles, and alternative modes such as rideshare or community shuttles. Expanding access to transportation options can have a significant positive health impact, especially for older adults who may face greater mobility challenges.¹³ Figure 23 shows the level of barrier by ZIP code in the Southern region for the transportation domain. One measure is considered in this domain: lack of reliable transportation among adults in the last 12 months.

Figure 23: Transportation Barriers

¹³ National Aging and Disability Transportation Center.

Figure 24 shows that all five counties are at or below the Texas benchmark for lack of reliable transportation, highlighting a broader, systemic transportation challenge within the service area. All five counties face significant gaps in public transportation options, particularly for individuals without access to a personal vehicle. Additionally, county-level data¹⁴ revealed both counties were above the national average for average distance to the nearest public transit, contributing to the elevated rates of lack of reliable transportation in the service area.

Figure 24: Lack of Reliable Transportation Among Adults by County (CDC PLACES [2024]). Higher transportation insecurity typically leads to less favorable health outcomes.

¹⁴ U.S Environmental Protection Agency Smart Location Database

Technology Access

Access to technology is increasingly important as the healthcare landscape becomes more digital, with greater reliance on electronic health records, patient portals, and telemedicine.¹⁵ Figure 25 shows the level of barrier by ZIP code in the Southern region for the technology access domain. Two measures are considered in this domain: residents without at least one computer device and residents without some type of internet subscription. These metrics reflect the level of technology access within the service area.

Figure 25: Technology Access Barriers

Figure 26 shows Erath, Comanche, and Eastland County are above the national benchmark in residents without some type of internet subscription, reflecting a barrier of technology access in these counties.

Figure 26: Technology Access Measures by County (American Community Survey [2019–2023]).
Higher technology insecurity rates could lead to less favorable health outcomes.

¹⁵ ONC, “Individuals’ Access and Use of Patient Portals and Smartphone Health Apps” (2023).

Connectedness

Connectedness is a key driver of health, as strong social connections are associated with lower rates of depression, anxiety, and stress and improved chronic disease management.¹⁶ Figure 27 shows the level of barrier by ZIP code in the Southern region for the connectedness domain. Three measures are considered in this domain: lack of emotional support among adults, feelings of social isolation among adults, and households headed by a single parent. These metrics reflect the level of social support experienced by adults in the service area.

Figure 27: Connectedness Barriers

While not all single-parent households lack social support, they are statistically more likely to encounter barriers that impact their ability to

¹⁶ Harvard T.H. Chan School of Public Health, “The Importance of Connections: Ways to Live a Longer, Healthier Life” (2023).

maintain consistent emotional or logistic support.¹⁷ Figure 28 shows all five counties are above the national benchmark for isolation and lack of emotional support among adults, reflecting a significant barrier of social support in the service area. Additionally, internal non-medical drivers of health screening data from Texas Health¹⁸ revealed the category with the most risk in the region was personal safety, aligning with the vulnerability of social support in the service area.

Figure 28: Social Support Measures by County (CDC PLACES [2024]). Higher lack of emotional support typically leads to less favorable health outcomes.

¹⁷ Springer, *Journal of Family and Economic Issues* (2018).

¹⁸ Internal Texas Health data.

Chronic Disease

A chronic disease is a long-lasting health condition that typically persists for one year or more and requires ongoing medical attention and/or limits daily activities. This domain evaluates adult prevalence rates of coronary heart disease (CHD), cancer, chronic obstructive pulmonary disease (COPD), high blood pressure (HBP), diabetes, asthma, and obesity across the service area. Table 3 summarizes these rates in the Southern region. **Green** indicates the measure is at or below the national average, and **Red** indicates the measure is above the national average.

County	CHD	Cancer	COPD	HBP	Diabetes	Asthma	Obesity
Comanche	10%	10%	10%	40%	16%	10%	39%
Eastland	10%	10%	11%	41%	16%	10%	37%
Erath	7%	8%	8%	32%	12%	10%	37%
Hood	9%	11%	9%	38%	14%	10%	35%
Johnson	7%	8%	8%	34%	13%	10%	40%
Texas	7%	6%	7%	33%	14%	10%	37%
US	7%	8%	7%	31%	12%	11%	34%

Table 3: Chronic Disease Prevalence by County (CDC PLACES [2024])

The findings indicate that HBP, obesity, and diabetes are the most prevalent chronic conditions across the Southern region. The highest rates are concentrated in Eastland and Comanche County, indicating a high need for chronic disease management in these areas. ZIP code–level data for all chronic disease indicators can be found in the appendix, which can be used to support localized planning and intervention efforts.

Figure 29 shows the barrier levels for chronic disease in the Southern region. ZIP codes with a higher barrier level typically experience more chronic disease compared to national benchmarks.

Figure 29: Chronic Disease Barriers

Behavioral Health

Behavioral health refers to the connection between behaviors, mental well-being, and physical health. It encompasses the prevention, diagnosis, and treatment of mental health conditions, as well as substance use disorders. Therefore, this domain examines rates of frequent mental distress, depression, cognitive disability, binge drinking, and cigarette smoking among adults. Frequent mental distress, depression, and cognitive disability all indicate the prevalence of mental disorders in the service area. Binge drinking and cigarette smoking can be risk factors for substance use disorders. Table 4 summarizes these rates in the Southern region. **Green** indicates the measure is at or below the national average, and **Red** indicates the measure is above the national average.

County	Frequent Mental Distress	Depression	Cognitive Disability	Binge Drinking	Cigarette Smoking
Comanche	17%	23%	16%	16%	16%
Eastland	19%	24%	17%	16%	18%
Erath	20%	26%	17%	19%	15%
Hood	16%	22%	13%	17%	15%
Johnson	18%	23%	15%	19%	16%
Texas	18%	22%	16%	18%	15%
US	17%	22%	15%	17%	15%

Table 4: Behavioral Health Measures Among Adults by County (CDC PLACES [2024])

The findings indicate there is a need for behavioral health services in the service area, as frequent mental health distress, depression, and cognitive ability affect 13% to 26% of adults in the region. Erath County has the highest rates of frequent mental health distress, depression, and cognitive disability. Table 4 suggests there are more behavioral health challenges in Erath County than the rest of the Southern region.

Figure 30 shows the barrier levels for behavioral health in the Southern region. ZIP codes with a higher barrier level typically have a higher risk of experiencing worse behavioral health outcomes.

Figure 30: Behavioral Health Barriers

Disabilities

Disabilities encompass any physical or mental impairment that may limit an individual’s ability to perform everyday activities and participate fully in social, economic, or community life.¹⁹ Therefore, this domain examined rates of deafness or difficulty in hearing (hearing); difficulty in doing errands alone, such as visiting a doctor’s office or shopping (independent living); difficulty in walking or climbing stairs (mobility); difficulty in dressing or bathing (self-care); and blindness or difficulty in seeing (vision). Table 5 summarizes these rates in the Southern region. **Green** indicates the measure is at or below the national average, and **Red** indicates the measure is above the national average.

Region	Any Disability	Hearing	Independent Living	Mobility	Self-Care	Vision
Comanche	38%	10%	10%	19%	5%	7%
Eastland	39%	10%	11%	20%	5%	7%
Erath	35%	8%	10%	15%	4%	6%
Hood	33%	9%	8%	17%	4%	5%
Johnson	32%	7%	9%	15%	4%	6%
Texas	33%	7%	9%	15%	5%	7%
US	31%	7%	8%	14%	4%	6%

Table 5: Disability Measures Among Adults by County (CDC PLACES [2024])

The findings indicate mobility limitations are the most common disability across both counties, signaling a need for transportation and daily living supports. Eastland, Erath and Comanche County have the highest prevalence of disabilities in the Southern region.

Figure 31 shows the barrier levels for disabilities in the Southern region. ZIP codes with a higher barrier level typically have more disability-related barriers to good health.

Figure 31: Disabilities Barriers

¹⁹ CDC, Disability and Health.

Primary Data: Themes

This section provides a summary of key themes in the Southern region, synthesized from findings across the community survey, stakeholder interviews, and focus groups. The survey explored trends that have emerged since the last CHNA and identified the most pressing community health needs. Interviews and focus groups centered on the core question: “What are the top three health-related problems in your community that you would like to see changed or improved?”.

Primary Data: Themes

Overview

This section summarizes key themes in the Southern region, drawing on findings from the community survey, stakeholder interviews, and focus groups. The survey explored trends that have emerged since the last CHNA and identified the most pressing community health needs. Interviews and focus groups were designed around the core question: *“What are the top three health-related problems in your community that you would like to see changed or improved?”*

Key Informant Interviews

Key informant interviews are structured, one-on-one conversations with individuals who have specialized knowledge about a community or organization. For this CHNA, ECG and Texas Health conducted interviews with 2 key informants across the Southern region. Importantly, these key informants were care transition managers—primarily nurses and social workers—who work directly with patients and families. The interviews focused on understanding community needs, identifying trends since the last CHNA, and gauging the visibility and reputation of Texas Health among community partners. By speaking directly with care managers,

the CHNA captured insights from professionals who have firsthand knowledge of the health challenges faced by community members.

Across the Southern region, behavioral health, transportation, and housing and utility costs emerged as the most frequently cited challenges. Care managers described limitations in transportation options, noting that there is no uber or taxi, and the public bus has limited hours as one informant noted: *“patient sometimes wait in the lobby for hours, even days.”*

Behavioral health was also highlighted as a critical medical driver affecting health. As one informant explained: *“We need more behavioral health access – both acute and non-acute”.*

Lastly, housing and utility costs were highlighted as a top concern, with gaps in homeless shelters. Key informants emphasized the growing homeless population as the region has *“few social services available – no true homeless shelter and small food pantries”*

Focus Groups

Focus groups are guided group discussions that bring together multiple participants to explore shared experiences and perspectives. For this assessment, 38 individuals participated in four focus groups across the Southern region, including two organizational sessions with local partner organizations and two community-based sessions with residents. Facilitators guided the conversation around community health needs, emerging health trends, and Texas Health’s presence and reputation.

Community participants emphasized the importance of transportation, access and navigation, and behavioral health. Transportation was described as a major barrier when public transit (CleTran) or familial support is not available. Many participants noted not all insurance is accepted, forcing some participants to have to travel to Fort Worth. Additionally, one participant noted *“Not knowing where to go look for information is one of the biggest issues, so where do I go, where do I start?”*. Specifically in Cleburne, the lack of OB services has impacted the community as one participant noted *“very sad to not have [OB services] in the community”*. Lastly behavioral health was a major issue as there was a sentiment *“where can we go for mental health services in the community?”*

Organizational participants similarly agreed with transportation but emphasized food insecurity and nutrition and housing costs as well. In Cleburne, one participant noted *“[we] need more access to food banks and food pantries – especially in Eastside community.”*

Community Organization Survey

The community organizational survey provides a complementary lens to the qualitative data from focus groups and interviews, capturing the perspectives of organizations that serve the six regions. Across regions, the survey highlights both progress and areas where community health has worsened since the last CHNA.

Southern

Among 140 respondents in the Southern region, 31% were aware of Texas Health initiatives.

2022 Priority Area	Improved	Stayed the Same	Worsened	n/a
Health literacy and navigation	23%	41%	6%	30%
Behavioral health	13%	41%	17%	29%
Chronic disease	13%	46%	11%	30%

While 23% reported improvements in health literacy and navigation, 17% indicated behavioral health had worsened, and 11% reported declining chronic disease outcomes.

Organizations highlighted support for substance use disorders and the unhoused, food insecurity and food-is-medicine initiatives, and mental health service expansion, particularly in rural areas. Access to providers, healthcare navigation, and loneliness among older adults were noted as ongoing challenges.

Summary Table of Top Three Health-Related Problems Identified in Southern			
Region	Key informant Interviews	Community Organization Focus Groups	Community Member Focus Groups
All Sixteen Counties	- Transportation - Behavioral Health - Housing and Utility Cost	- Behavioral Health - Access and Navigation - Transportation	- Transportation - Housing and Utility - Access and Navigation
Southern	- Behavioral health - Transportation - Housing and utility cost	- Food insecurity and nutrition - Transportation - Housing and utility cost	- Transportation - Access and navigation - Behavioral health

Closing Remarks

The 2025 CHNA for Texas Health combined extensive public data, internal risk screening tools, key informant interviews, focus groups, and a community organization survey to comprehensively evaluate health and quality-of-life needs within Texas Health Resources' primary service area and beyond. This multifaceted approach helped to ensure that diverse perspectives and reliable data informed the assessment. Texas Health will further explore these priorities during the development of the Implementation Strategy and create targeted plans to address the identified needs. We welcome your feedback on this CHNA report to help shape and improve future assessments.

If you have any feedback or remarks, please send them to

AdventHealth Addendum to the
2025 Community Health Needs Assessment
for
Texas Health Huguley Hospital Fort Worth South
And Texas Health Hospital Mansfield

December 2025

Texas Health Huguley Hospital Fort Worth South

Texas Health Huguley, Inc. dba Texas Health Huguley Hospital Fort Worth South (THH) was organized in 2012 as a joint venture hospital between Texas Health Resources (THR) and Adventist Health System Sunbelt Healthcare Corporation, dba AdventHealth (AH). THR owns 51% of the membership of THH with AH owning the remaining 49%. AH manages the daily operation of THH.

In this document, the hospital is referred to as “Texas Health Huguley.” Texas Health Huguley is a 346-bed acute care hospital located on I-35W in south Fort Worth in Tarrant County. It primarily serves Johnson and part of Tarrant Counties. Hospital services include a trauma level III emergency department, medical & cardiac intensive care units, a progressive care unit, open heart surgery center, a women’s center, general surgery, orthopedics & spine surgery, lab, imaging, wound care and hyperbaric services and behavioral health services.

Texas Health Hospital Mansfield Hospital

Texas Health Hospital Mansfield (THHM) is owned by Texas Health Huguley, Inc. and therefore operates as a part of the joint venture between Texas Health Resources and AdventHealth. Texas Health Hospital Mansfield believes that total health is achieved through a balance of physical, mental, social, and spiritual well-being.

Texas Health Hospital Mansfield includes a licensed 59-bed acute care hospital and an 80,000 square foot medical staff office building that houses primary care and specialty practices, as well as an outpatient center offering lab, therapy, and imaging services. Hospital services include an emergency department, cardiovascular, orthopedics, general surgery, and women’s services.

This addendum to the 2025 Community Health Needs Assessment (CHNA) provides updated information for Texas Health Huguley Hospital Fort Worth South and Texas Health Hospital Mansfield. It includes data on demographics, hospital utilization, health behaviors, health conditions, and social determinants of health to ensure the CHNA remains accurate and compliant.

Community Health Needs Assessments

A Community Health Needs Assessment (CHNA) is conducted every three years — including 2025 — to serve the communities as well as fulfill IRS requirements for not-for-profit hospitals. A Community Health Plan (CHP) designed to meet the CHNA identified needs is also part of the

process; the 2026-2028 CHPs for THH and THHM will be posted on the AdventHealth website prior to May 15, 2026.

2025 THR Regional Community Health Needs Assessment

Texas Health Huguley and Texas Health Hospital Mansfield are included in a regional CHNA in cooperation with THR and ECG Management Consultants (ECG), a healthcare consulting firm. The regional CHNA identified the following priority health needs for the Tarrant and Southern regions:

- Healthcare Access, Navigation, and Literacy
- Transportation
- Connectedness
- Food Insecurity

Texas Health Huguley and Texas Health Hospital Mansfield serve portions of both regions and have adopted the same priority health needs. The Texas Health Huguley board approved the 2025 CHNA on December 11, 2025. The Texas Health Hospital Mansfield board approved the 2025 CHNA on December 18, 2025.

The 2025 CHNA is posted on the Texas Health Huguley website: www.texashealthhuguley.org, the Texas Health Hospital Mansfield website: www.texashealthmansfield.org, as well as the AdventHealth website: www.adventhealth.com/community-health-needs-assessments.

This addendum to the regional CHNA includes an evaluation of the impact of actions taken to address the significant health needs identified in the 2022 CHNA for Texas Health Huguley and Texas Health Hospital Mansfield.

Asset Inventory for Texas Heath Huguley and Texas Health Hospital Mansfield

In order to target the priorities identified in this CHNA and to avoid duplication, Texas Health Huguley and Texas Health Hospital Mansfield built an asset inventory for its PSA.

In addition to helping set priorities, the inventory will be used to work collaboratively with community partners to develop comprehensive, effective and measurable interventions for the hospital and region.

Top Priorities	Current Community Programs	Current Hospital Programs
Healthcare Access, Navigation, and Literacy	Johnson County Indigent Healthcare Program; Starting Point Johnson County; Hope Clinic; Caring Physicians Charity Network; Crowley House of Hope Clinic; SaferCare Texas	Care Clinic; Mobile Health Unit
Transportation	City/County Transportation (CCT); Mobility Impaired Transit Services; Trinity Metro On-Demand	None at this time
Connectedness	United Way of Johnson County; Johnson County Library; Burleson Public Library; Senior Activity Center, Burleson; Burleson Recreation Center; Crowley Community Center; Crowley Recreation Center; Mansfield Public Library; Mansfield Activities Center	None at this time
Food Insecurity	Alvarado Helping Hands for Jesus; Operation Blessing; Promises Community Ministry; Harvest House, Johnson County Bread Connection; Crowley House of Hope; Meals on Wheels North Central Texas; Mansfield Mission Center; Harvesting in Mansfield; Common Ground Feed the Kids; Manna House Midlothian	Partner with Harvest House, Crowley House of Hope, Meals on Wheels of North Central Texas; Mansfield Mission Center; Harvesting in Mansfield; Common Ground Feed the Kids; Manna House Midlothian

Approval

As noted above, the priorities for the full Texas Health service area are Healthcare Access, Navigation, and Literacy, Transportation, Connectedness and Food Insecurity.

The Board of Directors for Texas Health Huguley and Texas Health Hospital Mansfield reviewed the regional CHNA data findings, priority needs and final report.

A list of board members for Texas Health Huguley and Texas Health Hospital Mansfield are listed below.

Texas Health Huguley Board Members

- TBD, Chairman
- Amy Papst, MD, Texas Health
- Dallas Owen, Regency Office & Promotional Products
- Ajith Pai, Texas Health
- Christopher Leu, Texas Health
- Trevor Wright, AdventHealth, Vice Chairman
- Vacant
- Carlos Craig, Southwestern Union Conference of Seventh Day Adventist
- Ana Patterson, Southwestern Adventist University
- Deval Mehta, MD, THH Medical Staff President
- Vacant

The Texas Health Huguley board approved the 2025 CHNA on December 11, 2025.

Texas Health Hospital Mansfield Board Members

- Trevor Wright, Board Chair, AdventHealth
- Penny Johnson, Texas Health Hospital Huguley
- Eulanie Lashley, Texas Health Hospital Mansfield (non-voting member)
- Dr. Nazia Sultana, THM Chief of Staff, Hospitalist
- Daryle Perez, Yellowstone Title
- Rick McWhorter, Texas Health
- Buddy Griffith, Southwestern Union conference of Seventh Day Adventists
- Jennifer Schroeder, Texas Health
- Joe Smolinski, City of Mansfield
- Erin Parde, AdventHealth
- Jennifer Stoecker, Mansfield Independent School District

The Texas Health Hospital Mansfield board approved the 2025 CHNA on December 18, 2025.

Community Health Plans Review

Texas Health Huguley 2023 – 2025 Community Health Plan Review

Texas Health Huguley Hospital Fort Worth South evaluates progress on its Community Health Plan each year. The following is a summary of progress made on the most recently adopted plan. The full evaluation is available upon request.

Mental Health

Mental Health was identified as a key priority in the 2022 CHNA due to high rates of depression and poor mental health in the service area. To address this need, the hospital focused on building awareness and support through education and faith-based outreach. In 2024, the hospital provided training on grief recovery and mental health support to 10 faith organizations and implemented the Spiritual Wholeness Screening Program with five local partners, including Next Step Women's Center, Burleson SDA Church, Caring Physician Charity Network, Emmanuel SDA Church, and Metroplex Family Church. In addition, five Mental Health First Aid trainings were offered in collaboration with local faith communities, strengthening early identification and response to mental health needs. The hospital continues to expand these initiatives through 2025 to promote whole-person well-being across its service area.

Food Insecurity

Food Insecurity remained a significant community concern, with 13.9% of residents lacking consistent access to nutritious food. To help address this issue, the hospital launched a community garden initiative that pivoted from a single ¼-acre site to 10 raised-bed gardens, increasing local access to fresh produce. The hospital also continued its partnership with Grace Temple Church in Fort Worth to strengthen food pantry operations and distribution efforts. These partnerships aim to expand healthy food options for families experiencing food insecurity and support sustainable access to nutritious meals.

High Blood Pressure

Hypertension was identified as a growing health risk in the 2022 CHNA. To increase community awareness and prevention, the hospital provided Diabetes and Nutrition Education workshops to 241 participants, including cooking demonstrations, exercise coaching, and free blood pressure screenings. These educational programs promote healthier lifestyles and encourage early detection and management of high blood pressure.

Healthcare Access and Quality

Limited access to affordable health care and the lack of a medical home were key issues for underserved residents. The hospital addressed these barriers by expanding primary care services through the Texas Health mobile health bus, which provided care at nine locations and served more than 900 patients in 2024. Additionally, the Care Clinic continued to offer 1,400 encounters for uninsured patients discharged without a medical home, ensuring continuity of care and improving access for vulnerable populations.

Texas Health Hospital Mansfield 2023 – 2025 Community Health Plan Review

Texas Health Hospital Mansfield evaluates progress on its Community Health Plan each year. The following is a summary of progress made on the most recently adopted plan. The full evaluation is available upon request.

Mental Health

Mental Health was identified as a key priority in the 2022 CHNA due to high rates of depression and poor mental health in the service area. In 2024, the hospital advanced efforts to build awareness and faith-based support through educational programming. Sixteen lay chaplains were trained in the basics of pastoral care and grief support at the Mansfield Mission Center, expanding the hospital's reach to community members seeking mental health resources. Additionally, the hospital launched the "Good God, I Grieve" seminar series to address grief and loss. The first session was hosted at Midlothian One Church, and additional sessions are being planned for 2025 as demand continues to grow among local congregations.

High Blood Pressure

Hypertension continues to be a leading chronic health concern for the community. To promote prevention and healthy lifestyle habits, the hospital facilitated six Dietary Approaches to Stop Hypertension (DASH) workshops in partnership with the Mansfield Seventh-day Adventist Church. In total, 160 individuals participated in DASH diet cooking schools and educational sessions, learning practical ways to manage and reduce high blood pressure through nutrition and exercise.

Food Insecurity

Food Insecurity remained a significant challenge across the hospital's service area. To expand access to nutritious foods, the hospital partnered with Harvesting in Mansfield Center Food Bank, providing \$4,000 in support for the launch of its Fresh Market program, which allows guests to shop for free groceries and fresh produce. The hospital also partnered with HIM Center Food Bank and Trinity Community Foundation to host two Healthy Food Initiative Play Days at Breezy Oaks Mobile Home Park, offering healthy foods, blood pressure screenings, and nutrition education for families. These events will continue bi-monthly through 2025.

Health Care Access and Quality

Access to care was identified as a key determinant of community health. The hospital planned to increase health insurance education and primary care access through Texas Health Huguley's mobile health unit. Due to maintenance and scheduling challenges, the unit was not deployed in 2024, but coordination efforts are underway to resume operations and expand outreach in 2025 to underserved neighborhoods in Tarrant County.

2022 Community Health Needs Assessment Comments

We posted a link to the most recently conducted CHNA and the most recently adopted implementation strategy, 2023-2025 Community Health Plan on our hospital website as well as on AdventHealth.com prior to May 15, 2023 and have not received any written comments.

Primary Data Collection

Appendix B

Texas Health Resources

2025 Community Health Needs Assessment

As part of the 2025 Texas Health Resources (THR) Community Health Needs Assessment, three primary methods were utilized to collect qualitative data from community partners and members. The following outlines the key questions asked within each data collection approach:

- Key Informant Interviews
- Focus Groups
- Community Organization Survey

I. Key Informant Interview Questions

- What do you think are the three to five most pressing health disparities in your community today?
- What nonmedical drivers of health do you believe are most prevalent among your patient population, and how are they contributing to these health disparities?
 - Access to healthcare (e.g., access to screening, primary care utilization)
 - Economic factors (e.g., income, employment)
 - Education (e.g., high school diploma, higher education)
 - Neighborhood and built environment (e.g., housing and food insecurity, transportation)
 - Social context (e.g., lack of social support, single parent households)
- Are there specific populations within your community who are disproportionately impacted by these nonmedical drivers of health and health disparities?
- What services or programs do you believe could have a positive impact on the issues you have identified?
- Who are the key community partner organizations you utilize as resources for addressing these disparities or other identified issues?
- What do you think THR has done well in the last three years with respect to improving or eliminating health disparities and generally promoting health and wellness in the community? Do you have any specific examples?
- What opportunities do you believe exist for THR to do more?
- What barriers or limitations exist that prevent THR from doing what needs to be done to improve the health and quality of life for members of the community?
- Is there anything else you would like us to know or consider as we assess the health needs of the community?

II. Focus Group Questions

- Have you noticed improvements in these three (behavioral health [e.g., anxiety, depression, resiliency], chronic disease [e.g., diabetes, hypertension], awareness, health literacy, and navigation [e.g., access to healthcare, access to healthy foods]) priority areas since 2022?
 - If so, what have you seen be effective?
 - If not, what do you believe the barriers to improvement are?
- What would you say are the top-three health-related problems people in your community are facing that you would like to change or improve?
 - Why do you think these are the most important health issues?
 - What would you do to address these problems?
 - Do you have any examples of specific programs or services that would be needed to address these problems?
 - What might prevent someone from accessing care for the health challenges identified above?
 - What services does your organization offer that are focused on these health issues?
 - By show of hands, how many of you offer services through your organizations that are focused on these health issues?
 - What resources are currently available for residents in your community for the identified health problems we have discussed today?
 - Are there resources currently available through other entities that are related to these areas?
- Are there any specific community organizations or agencies that you see taking a strong leadership role for improving the health of your community?
 - Do you see residents fully utilizing these programs and services? Why or why not?
- What additional programs and resources do you think are needed to best meet the needs of residents in your area?
- Are you aware of any THR community health improvement program(s) in your community?

III. Community Organization Survey Questions

- Are you aware of any THR programs, initiatives, and/or resources specifically addressing any of these priorities in your community? If so, please list the THR programs, initiatives, and/or resources you are aware of in the text box.
- Have these priority areas improved, worsened, or stayed the same in your community compared to 2022? (Behavioral health [e.g., anxiety, depression, resiliency], chronic disease [e.g., diabetes, hypertension], awareness, health literacy, and navigation [e.g., access to healthcare, access to healthy foods])
- What are new or additional areas of opportunity THR should explore?

List of Community Partners

Appendix C

Texas Health Resources

2025 Community Health Needs Assessment

Below is a list of community partners (A–Z) who participated in a focus group or the community organization survey. We extend our sincere appreciation for their engagement and hope this effort also increases community awareness of these organizations.

- 211 Texas
- 5 Stones Foundation
- 50 Women Strong
- Abide Women’s Health Services
- AccelHealth
- Advocates for Community Transformation
- Alliance For Children
- Alvarado Helping Hands for Jesus
- Alzheimer’s Association
- Ambassadors For Aging Well (and Arlington Mayor’s Advisory Council for Older Adults)
- American Cancer Society
- American Diabetes Association
- Annie’s Therapeutic Companions
- Arlington Housing Authority
- Arlington Independent School District
- Arlington Latino Advisory Council
- Arlington Public Library¹
- Ascend Dallas
- Avance North Texas
- BarbaraCares
- Baylor Collaborative on Hunger and Poverty
- Be Natural Music Therapy and Wellness
- Big Brothers Big Sisters Lone Star
- Black Heart Association
